Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from First Principles of Natural Philosophy The growth of physical science has rendered it more and more certain that phenomena of all kinds and in all places are due to the qualities and activities of the ultimate atoms of matter. Astronomy, Geology, Chemistry, and Physiology are each easily reducible to the same factors, and hence these sciences may properly be classed as departments of physical science. The name Physics has heretofore been held to apply to phenomena which could not properly be included in the above sciences. For that reason, and to emphasize the relationship of these to fundamental physical principles, the name Natural Philosophy has been adopted for this book, restoring an old term to its proper place, and giving it its proper meaning. The effort has been made to direct the attention of the student from the physics of mechanism to the physics of molecules, and help him to carry the mechanical conceptions gained by the study of visible bodies to their ultimate particles.
