They should then be placed at a slant in a trench dug to the depth of one to two feet and covered with soil to at least one foot above the roots, packing the same by pouring water or tramping the soil about the trees. If it is late in the spring and the weather is warm and dry, especially if there is any sign of bark shrivelling, the whole bundle of trees or shrubs should be laid ?at in a trench and covered, tops and all, with at least one foot of soil, after which the trench should be filled with water each day for three or four days. In case it is not convenient to heel in the trees at once, the whole bundle may be dipped in a tub of water, or held under the faucet to moisten the packing well, after which they may be kept for a.
